

Effortless Adjustment

Experience elite performance with our ELITE line of flat screen monitor arms. The ELITE monitor arms feature lift-and-pivot technology which allows the user to effortlessly position the height of the monitor without handles or tools. The 24" arm will allow users extended reach as well as the ability to easily fold back the arm when not in use. The sleek look of the ELITE arm compliments any workstation design.

Built-in Cable Management

Cables are guided along the underside of the arm for a clutter-free work area.

Effortless Adjustment

Lift-and-pivot motion technology allows the monitor to be re-positioned with smooth effortless movement.

VESA Compatible

VESA 75 mm and 100 mm compatible. Simply match up the hole pattern on the arm to the back of the monitor.
