

Keyboard Tray

An articulating keyboard system is the most important component of an ergonomic workstation next to the chair. For people who work on a computer for 2 or more hours per day, a high-end articulating keyboard system can provide serious protection from a variety of musculoskeletal disorders, including Carpal Tunnel Syndrome, neck pain, and upper and lower back pain.

2G mechanism with 6.25" height adjustment

-0 to -15 degree platform tilt encourages low risk typing posture

Slider platform allows left or right handed users to work comfortably

20" foam palm rest to ensure maximum wrist support

A simple one-handed motion allows the keyboard to be repositioned
