Laser Safety Room

Our BEAMSTOP'R Laser Safety Room offers a safe and affordable solution for class IV laser working spaces. The rooms are custom sized to your specifications and are constructed of 2-1/4" thick steel trim on all sides. The panels are black, Blackout and flame retardant.

The following options are available:

- 2 x 4 standard acoustical drop ceiling
- 3 bulb T8 fluorescent lighting with electronic ballast
- Ceiling mount infrared sensor to prevent false activation
- Thick double sided Masonite door with flame retardant core
- ADA compliant entrance lockset- can meet building requirements
- 7000BTU HVAC unit with remote control
- Limit switch which can deactivate the laser when door is open
- Acrylic, laser rated viewing window
- Interior desking system with storage solutions
