## Pre-Owned Enhanced Steelcase 9000- Limited Quantity

When cost matters, pre-owned workstations are a great alternative to new. They are also the "greenest" option on the market today. Nothing is more sustainable than reusing what has already been manufactured. Each station will save approximately 460 pounds from being sent to landfills around the country.

Worksurfaces are new, 1-1/4" thick with 3mm edge and can be made using any of our standard Wilsonart laminates. The 24" BBF and FF pedestals are pre-owned Avenir Benchmark.

### Product Information

65" and 42" high panels available

6 x 6 configuration

Power pole/Base feed not included

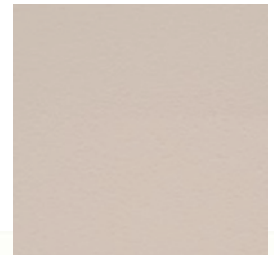

Expanded base for power

Overhead bin with 65" panels only
